Tutorials In Mathematical Biosciences Iv Evolution And Ecology Lecture Notes In Mathematics Mathematical Biosciences Subseries

Tutorials in Mathematical Biosciences IV: Evolution and Ecology (Lecture Notes in Mathematics / Mathematical Biosciences Subseries) | Avner Friedman | ISBN: 9783540743286 | Kostenloser Versand für alle Bücher mit Versand und Verkauf duch Amazon.

Tutorials in Mathematical Biosciences IV: Evolution and ...

The next chapter reviews a broad range of ongoing research in population dynamics, including evolution of dispersal models; it also features interesting mathematical theorems and lists open problems. The final chapter deals with gene frequencies under the action of migration and selection. The book is addressed to readers at the level of grad students and researchers. A background in PDEs is ...

The Dynamics of Migration–Selection Models | SpringerLink

Reaction-diffusion equations are widely used as models for spatial effects in ecology. They support three important types of ecological phenomena: the existence of a minimal patch size necessary to sustain a population, the propagation of wavefronts corresponding to biological invasions, and the formation of spatial patterns in the distributions of populations in homogeneous environments.
